Instructions:

Watch a video showing how to make this **fta** www.youtube.com/watch?v=ulqMpghBBz0

Step 1: Prepare your pieces.

- x Cut the black and yellow sheets of construction paper in half.
- x On one of the half sheets of blapkaper, use acup or jar lid to trace a circleabout "inches ~ ó X ñ u wide itamunt.cut
- x From the same sheet, cut two strips 6 inches (15 cm) long. One should be 3/4 inch (2 cm) wide, and the other should be 3 inches (7.5 cm) wide.
- x On the other half sheet of black paper, trace a same-sized circle near the top. Cut out the circle, making sure to leave the rest of the sheet intact.
- x Cut a strip of thin cardboard 6 inches (15 cm) long and 3/4 inch (2 cm) wide.

Step 2:Assemble your piece lue the black sheet with the cut-out circle to a half sheet of yellow

The Phases of the Moon

Why does the Moon appear to change shape?

The M $\}$ v $\}$ • v [š ‰ Œ $\}$ µ]š • $\}$ Á v o] P Z š o] I • š Œ the light from the sun! The moon also orbits the Earth every 28 days. We see the moon change shape, but this is not because it receives less light (or gets smaller). One half of the Moon is still lit up by the sun Instead, we see the light side of the Moon differently depending on where the Earth is compared to the Moon and Sun.
