UAMN Virtual Early Explorers: Carving

Snow Carving

Explore snow carving outdoors anddoors!

Carvingis the act of shaping something by scraping or cutting away portions of material. Try introducing carving to young children with snow carving activities. Snow is softer and more easily carved than with other traditional materials such as wood or bone.

Materials:

Fresh snow, stick, large mixing bowl, tray, plastic sporopropsicle stick.

Instructions:

Outside:

Step 1:Look around and find a short stick. Make sittre does not have splinters, and the ends are not sharp.

Step 2:Use the stick to carve lines in the snow. Experiment with shapes and designs.

Step 3:Snow carving lasts only a little while, take a picture to remember and share your tste whie71.999(th)69
