

Example of a complete description

Theory a

Practice of veterinary medicine by pres

University of Veterinary Medicine Vienna

Will this course be used to fulfill a requirement for the baccalaureate core? If YES, attach form.

YES

IF YES, check which core requirement(s) it could be used to fulfill

and in Banner.

6/20/2020

RESTRICTIONS ON PROGRAM

PLEASE SPECIFY POSITIVE AND NEGATIVE IMPACTS
Please specify positive and negative impacts on other courses, programs, etc.

any from SNR actions may

Page 1 of 1

- Outline the structure of clinical and basic neuroscience in the following parts:

Total points ~ 200

There will be 10 lectures. The final is not cumulative. Grades for your exam

- Lectures
- Exams
- Assignments
- Quizzes
- Final Exam

of night

Must be informed to inform the instructor on site and provide a written statement from a licensed physician.

Grading Scale:

Grades will be calculated on a 100 point scale.

Tentative Lesson Plan

Week	Topic	Activities	Assessments
1	Introduction to Algebra	Review of arithmetic operations, introduction to variables and algebraic expressions.	Classroom exercises, homework assignments.
2	Linear Equations and Graphs	Solving linear equations, graphing lines on a coordinate plane, understanding slope and y-intercept.	Graphing projects, problem sets.
3	Systems of Linear Equations	Solving systems of two linear equations in two variables using substitution and elimination.	Word problems, graphing systems.
4	Quadratic Equations and Functions	Solving quadratic equations, graphing parabolas, understanding the relationship between equations and graphs.	Graphing projects, problem sets.
5	Polynomial Equations and Functions	Adding, subtracting, multiplying polynomials, solving polynomial equations.	Graphing projects, problem sets.
6	Rational Equations and Functions	Simplifying rational expressions, solving rational equations, graphing rational functions.	Graphing projects, problem sets.
7	Radical Equations and Functions	Simplifying radical expressions, solving radical equations, graphing radical functions.	Graphing projects, problem sets.
8	Complex Numbers	Operations with complex numbers, understanding the complex plane.	Problem sets, graphing projects.
9	Trigonometry	Understanding trigonometric functions, solving triangles, graphing trigonometric functions.	Graphing projects, problem sets.
10	Calculus Introduction	Introduction to limits, derivatives, and integrals.	Problem sets, graphing projects.
