As indicated in Table 2, the mean and other 2, 3, 5, 10 quantiles of the estimated error variance were calculated.

After the first year, the number of students in each class increased by 25%. In the second year, the number of students in each class increased by 20% again. If there were 100 students in the first year, how many students are there now?

在本研究中，我們發現了多個與疾病相關的基因座，這些基因座可能參與了疾病的發病過程。

• The *liver* is the primary site of metabolism for many drugs.

As a result, the number of people who have been infected with the virus has increased rapidly, leading to a significant increase in the number of deaths.

Figure 1. A schematic diagram of the experimental setup. The light source (laser) emits light at $\lambda = 532$ nm. The beam splitter (BS) splits the beam into two paths. The first path contains a lens (L₁) and a polarizer (P₁). The second path contains a lens (L₂) and a polarizer (P₂). The two paths converge at a point where they are imaged by a camera (C). The camera captures the interference pattern.

For more information about the study, please contact Dr. Michael J. Hwang at (310) 206-6500 or via email at mhwang@ucla.edu.

• **Wetland**: A wetland is a land area where the soil is saturated with water for long periods of time. This saturation creates conditions that support the growth of wetland plants.

ANSWER: The answer is **10**. The first 10 digits of π are 3.1415926535.

After you finish reading your own writing, ask a friend to read it too. Ask them to tell you what they liked about it.

For more information about the study, contact Dr. Michael J. Hwang at (319) 356-4530 or via e-mail at mhwang@uiowa.edu.
