There will be a variety of assignments that are designed to encourage discussion. The texts and articles that are posted on the Blackboard will be integrated into the discussion. The assumption is that you will read the texts and

Description of Assignments

- 1. **Jigsaw**: This is a fast paced course with lots of reading. In order to maximize and facilitate the process, I will assign you to a group. Each group will be responsible for reading and summarizing specific chapters from the texts. I will post a discussion board link for each group that is accessible only to members of the group and to me. You may use that for online discussions. The job of each group is to not only summarizing what the chapters covered, but to discuss the applications and implications of the topic. The groups will be assigned during the first class.
- 2. **Response Papers**: There will be a variety of "experiences" listed in the syllabus where you will be asked to post a response. A response is meant to be a reflective reaction to the topic. You will not be evaluated by whether I agree with your comments, but by the quality of the discussion.

 Some of the responses will involve summarizing observations, thoughts on the issues raised by speakers, and topics that are discussed in class. The responses will be listed in the syllabus and on the Task menu on blackboard.

3.

e. Develop an IFSP/IEP for this child. (I will provide a sample but you may also use forms used by your district).

INDIVIDUALIZED FAMILY SERVICE PLAN

In the case of a child with a disability who is age three through five, an individualized family service plan (IFSP) may serve as the IEP for the child if using that plan as the IEP is agreed to by the District and at least one of the child's parents. If use of an IFSP is being considered, the District must provide the child's parents a detailed explanation of the differences between an IFSP and an IEP. If either parent chooses an IFSP, the District must obtain written, informed consent of that parent.

The IFSP shall be in writing and contain:

- 1. A statement of the infant's or toddler's present levels of physical development, cognitive development, communication development, social or emotional development, and adaptive development, based on objective criteria;
- 2. With the agreement of the family, a statement of the family's resources, priorities, and concerns relating to enhancing the development of the family's infant or toddler with a disability;
- 3. A statement of the major outcomes expected to be achieved for the infant or toddler and the family, and the criteria, procedures, and timelines used to determine the degree to which progress toward achieving the outcomes is being made and whether modifications or revisions of the outcomes or services are necessary;
- 4. A statement of specific early intervention services necessary to meet the unique needs of the infant or toddler and the family, including the frequency, intensity, and method of delivering services;
- 5. A statement of the natural environments in which early intervention services shall appropriately be provided, including a justification of the extent, if any, to which the services will not be provided in a natural environment;
- 6. The projected dates for initiation of services and the anticipated duration of the services;
- 7. The identification of the service coordinator from the profession most immediately relevant to the infant's or toddler's or family's needs (or who is otherwise qualified to carry out all applicable responsibilities) who will be responsible for the implementation of the plan and coordination with other agencies and persons; and
- 8. The steps to be taken to support the transition of the toddler with a disability to preschool or other appropriate services.

The individualized family service plan must be evaluated at least annually and the family must be provided a review of the plan at six-month intervals (or more often where appropriate based on the child's and the family needs).

Subject Selection Options:

Option 1: If you have access to a child who has been identified as having a disability or developmental delay, observe the child, in a natural setting, and if possible interview parents and caregivers.

Option 2: If you do not have access to a young child, but do have access to an older child, perhaps the subject of the Transition plan, use existing family issues/dynamics to develop a theoretical IFSP/IEP. You can base your plan on what parents tell you or on what you think might have been appropriate interventions when this individual was an infant or young child.

Option 3: If you do not have access to "real" children, view one of the following movies, "My Left Foot" with Daniel Day Lewis, or "What's Eating Gilbert Grape' with Leonardo DiCaprio and Johnny Depp. Both of these films present issues related to families and children with Disabilities.

Option 4: Use "Elaine's Story" which is the life story of a boy with Spina Bifida told from the mother's perspective.

4. Field study of preschool for at least 15 hours. Complete the following log sheet. Name:							
School:							
Time Sheet / Log for Field Experience EDSE 605
