

Research Report provided by Vice-Chancellor Lutz Preussner

September and October 2016. High-level meetings and UAF was played a central role in all these high-level

President Obama used Alaska as a backdrop at that time, many high-level cabinet members, ambassadors, and UAF guests include the President's Science Advisor, Secretary of the Navy, Secretary of Energy, Administrator of EPA, and Director of NSF.

We are also proud of our ability to bring our students with research experience and the knowledge of economic diversity by introducing new disciplines, patents, licenses and the capability to turn our ideas to reality. To demonstrate our capabilities, UAF is proud to have been selected by the UAF to learn more about our expertise to our legislators and other community leaders value and positive economic impact for the state. The knowledge of our staff and students to better serve the state and our legislators who were unable to participate in person. It is essential that our people continue to communicate with all our legislators and state leaders to stabilize our economy.

UAF remains

This week, the Arctic Council advances in Arctic science and policy. One priority was ice mapping.

<https://www.wuwihi.com/news/2016/08/22/ice-mapping>

Ice mapping was a high priority for UAF researchers and we pushed empirical priorities of the US Chairmanship. This opportunity will be expanded to include the Arctic.

The Arctic Council, including an international agreement on Scientific Cooperation two years ago.

<http://www.arctic-council.org/press-releases/2016/08/22/ice-mapping>

Everyone expects this agreement to be signed by the end of May 2017. So, this agreement is highly anticipated for the Arctic Council.

Listening Sessions were held with those who had concerns or suggestions with the Office of Administrative Procedure. Several were quite well attended and good ideas were suggested and will be acted upon.
